Subject: Re: Brazil data

I believe Lautenberg will need some action by the Brazilians on the custody matter to explain dropping the hold. What, if anything, could we expect or request?

Just to keep you up to date, below is an email from Demetrios describing Ron Kirk's conversation of a few minutes ago with Sen. Lautenberg. It also indicates that Lautenberg is like to call you to get a status report on developments in Brazil to be sure that we are doing all we can on this case.

I will post Craig on this.

Bob: Kirk just got off with Lautenberg. They spoke for about 20 minutes. While the Senator would not commit to removing the hold, he asked lots of questions about GSP. Kirk talked him through that, as well as the effect of the pending cotton retaliation matter with Brazil.

Lautenberg mentioned that he is interested in talking to Secretary Clinton again about how talks on the custody issue are progressing with Brazil. Kirk's sense was that he wants to be sure we are using all of our leverage to get Brazil to the table.

He would also welcome receiving the kind of data that we are currently producing. Once we finalize it, we will get to you and Lautenberg's staff.

I'll let you know if I hear more.

D.

This is great. I will tell HRC that this data is being compiled and that you, craig and I are going to try to see L monday or tuesday to describe the impact of what will happen if gsp is interrupted. And I totally agree with you that using brazil only numbers would actually strengthen his resolve. Sen. L is a very smart guy and understands the national interest -- so these other numbers would be more helpful, and the point on intermediate goods is particularly good!!!

I will report back to you after hearing back from her.

Subject: Brazil data

Bob: attached is Brazil-specific GSP data. It's not that useful in that it emphasizes how important GSP is for Brazil and the products from Brazil that come into the US duty free. I have asked our folks to broaden this out so that it captures data for all 131 countries that benefit from GSP. Focusing on Brazil alone really just plays into Lautenberg's argument that GSP is important to Brazil, so he should keep a hold on the legislation.

But, one thing on the attached that is useful. In the last para, it says that close to 90 percent of Brazil's GSP exports are intermediate products -- 25-50 percent of which are intercompany transfers between US companies and Brazilian

affiliates. That underscores the importance of GSP to manufacturers based in the US, who rely on GSP for their manufacturing here and, by extension, the jobs that this manufacturing supports.

We will get you more broad data this afternoon.

D.

Subject: RE: Talking Points

Attached is what we came up with on Brazil. Unfortunately, we aren't able to tie things now directly to NJ: that takes lots of digging, both official and informal. Would it be helpful to have an overview of the import of the full gsp prgm, since that is at risk with this hold?
