**Subject:** Update on DoD assets for evacuation from Tunisia

Folks, Crisis Management is getting from their counterparts word that SecDef has issued instructions for C-130s to start moving immediately, planners are finalizing plans which should become clearer in the next 1-2 hours, and arrival of assets into Tunisia is looking like tomorrow during the day. More to come midday. I understand PRM has a 1230 video conference slated – there should be an update during that VTC.
