Subject: DHS Tearline

SBU/SENSITIVE SECURITY INFORMATION (SSI)

We wanted to provide heads up concerning a tearline that DHS/TSA is in the process of preparing, and that could go out as early as this evening, to U.S. and foreign air carriers as well as to selected foreign governments within Western Europe, the Middle East and Africa. As we understand it, the tearline would include information that extremists may be considering surgically implanting explosives in humans and animals to conduct terrorist attacks. The information will be protected as SSI, but as always, there is a possibility it could be released publicly.

For further information or questions, please contact S/CT.

Please protect this information and limit distribution.
