Subject: Global Fund and Burkina Faso -- Confidential -- Please do not forward

B6

This is to alert you that the Global Fund will be posting today on its website an announcement that it has determined that approximately 2 million of the 6.45 million bednets supported by the Fund and delivered to Burkina Faso in 2010 have been improperly treated with insecticide. The Fund is affirmatively announcing that it is stopping further distribution of these nets within Burkina Faso, accelerating plans to replace untreated nets, and intensifying its quality testing programs. < >
