**Subject:** Here my draft

B6

Dear Hillary,

A few meetings ago, we talked about how we – US companies and the USG - can help other countries develop the shale oil and gas with hydraulic fracking in an environmentally responsible way. The responsible development of these resources can change the energy and geo-political landscape in profound ways.

The DOE points of contact who can support State:

Chuck McConnell  
 Asst. Secretary for Fossil Energy  
[Charles.Mcconnell@doe.gov](mailto:Charles.Mcconnell@doe.gov)  
 Office: 202-586-6660  
 Cell: [ ]

John Duda  
 Director, Strategic Center for Natural Gas and Oil  
 National Energy Technology Laboratory (NETL)  
 [ ]  
 (304) 285-4217

I am sorry to have taken so long...in part because I had to navigate through the "Texts from Hillary" web site with an ultra-slow connection.

Cheers,

Steve

PS: The second attachment from the *New Yorker* is relevant to our scheduling lunch.

Steven Chu  
Department of Energy
